To The Development Manager

Susan Dixon

Dear Sir,

Development Proposal on R121M-mod

I am still horrified by what you propose on this site. I have written before, as have many others, to give reasons why this land should not be built upon. Yet now we have another deadline for comment because some new expertise has been wheeled in to support your proposals.

This new expertise from AECOM is wholly irrelevant. They have said nothing that has not been said before.

The field in question is part of a beautiful landscape which can be seen from main road, railway lines, and across the valley. Access is difficult, and will be highly congested, whether via Castle Green Lane or Oak Tree Road.

This field should not be built on.

Yours in hope,

Susan Dixon
