**RE: Land Allocations DPD consultation**

**Objection to: R129, E33 and SL1B (Southwest Map Kendal)**

Dear Sir/Madam

I wish to oppose the allocation of land adjoining Underbarrow Road: R129M as a site for residential development; E33 for Employment; and SL1B as a Household Waste Recycling facility; on the basis that the development of these sites would lead to the generation of a much higher volume of traffic up and down Greenside, which is a residential area, and consequently to an increase in noise, emissions, carbon footprint and hazard to pedestrians.

It would also lead to increased congestion in the already heavily congested All Hallows Lane, increased traffic along Queens Road and Gillinggate, and a significant reduction in the safety of Greenside and Beast Banks where speeding is a problem. Although R129M appears close to the town centre the fact that it is on average 75 metres (250 feet) above the town centre via a steep hill means that access on foot or by bicycle would be restricted to very few so that sustainable travel choices would be limited.

Yours sincerely,

Mrs J A Bullock
