Dear Mr McNicoll

I wish to add my concern as a resident of Kents Bank about the inadequacy of the local road infrastructure to accept the extra traffic these developments would generate in addition to other traffic passing through. There is little or no scope for road widening and inevitably there would be unacceptable congestion, noise and danger to pedestrians as well as wear and tear on the existing roads which are already in poor condition. This large-scale development is definitely undesirable from many aspects.

Yours sincerely,  
E P Dallimore
