There are several sites in and around Kirkby Lonsdale which are being looked at for additional development. I live in Barbon but I have two young children who attend St Mary's Primary School. I have looked at the proposed sites and the one which is most suitable is the development to the south by the Booths roundabout. Access during construction and when completed is excellent. All the other site involve additional traffic on already over loaded little town and may increase the weight of traffic passing close to both the primary & secondary schools in my view.
