I would like to make the following comments about the proposed alternative land allocation sites

1 A590 Corridor and Junction 36 EN56 Proposed mixed housing and employment use

I strongly object to the proposed allocation of this entire strip of land for employment and housing. This ribbon development is entirely out of keeping with the character of the rural landscape. Other proposed developments around Brettarg holt roundabout itself would have to be appropriate in scale and sensitively sited.

2 Kendal SE M40# and R140# Proposed Mixed residential and housing

I object to the proposal to use these two fields for housing and employment. These green fields are a welcome visual reminder of our rural environment. Being rising land they are prominent and add greatly to the character of the urban landscape here.

3 Oxenholme: M2#, M5# R120# RN301 Proposed extension

Whilst some development may be appropriate here I feel that some green space needs to remain to retain the separation of Oxenholme from Kendal
