Dear Sirs

With regard to the above land allocation site, I would like to point out that there could be a surface water problem if this area is used for housing. After heavy rain, the fields above this site, are full of streams on the surface of the ground. The water from these must collect somewhere at a lower level and could affect houses on the proposed site. Former flood protection work did not address this problem.

Your faithfully.

M E Reed

PS I do not wish my email address to be published. Thank you.
