

FCLE 179

P. A. B. HULSON

30/8/2011.

SOUTH LAKELAND
DISTRICT COUNCIL
RECEIVED

- 1 SEP 2011

Dear Sir

REVS & BENS

It is with regret I have to write to you, again, with reference to this building the Council intends to put in place in the areas on the map sent to me.

First may I say my position as Chairman of Stock Beck Action Group when I hear of thinking of putting houses, with any water from them coming into our scheme is scandalous.

Also I have heard it is been considered to build at the fields of Whitbarns Close

P.T.O

Surely whoever has thought this one up, sits in their trains.

Certainly one not fit to run any public requirements.

The building by Oak Tree Road agreed has been part taken out.

Only to be added in a different way. Personally I think the

land owners are nothing but greedy for money. The builders

I noticed are the ones who

could not cure a job, as

long as they can walk away

and leave everybody concerned flooded.

Correcting the attenuation, which would have to be put in place to stop overflow and flooding this would cost more than the original scheme to stop no flooding.

FCLE1793.

The people down below on the line to the river, I feel would be most affected, but Calder Drive also would be badly hit.

Seems by those considerations there is no necessity up here so why even consider this action.

Houses are not selling anyway so why build more.

Please excuse the bad writing but I am very ill at the moment. But felt this letter needed writing.

Yours Sincerely
