30 July 2011.

Dear Mr. Hudson,

Your Ref.DH/60.12.43

Local development framework land allocations-further consultations.

Thank you for your letter of 28/7/2011 . I wrote in February 2009 with details of my interest and my comments in response to the Land Allocation Plans at that time concerning area R65 as possible employment land .Later proposals added RN169M as possible residential land ,I did not send in a comment about that because I believed that sensitive residential development in part of that site might be acceptable in general. The latest proposals, however, should not go without comment which I wish to add to those I made earlier.

The proposal by Walker Morris for the Ellis family for RN299 as an extension of R169M would I believe , if allowed ,lead inexorably to the urbanisation of all that area between Kendal and Burneside . I also believe that the way these proposals have grown reveals the intention of the developers to achieve this outcome and should be resisted from the start.

Yours sincerely

Robert Brown.
