SLDC
South Lakeland House.
Kendal.

Local Development Framework for Castle Ward, Kendal

I write as a resident at the above address, having lived in this house for over twenty years. I understand that intensive development is proposed on R 121 – R141 – and R56 on leaflets that I have seen. My concerns are two-fold i.e.

1) Access to and from the site – old Sedbergh Road is fairly steep and winding at that point.

2) Drainage – Given the steepness of the slope and although the Stock Beck Scheme has been implemented there have been occasions when the amount of water coming off the hill on to both the main and old Sedbergh Road has been verging on the hazardous.

My concern is that adequate drainage schemes should be mandatory in the development of this site in order to avoid much misery in the future.

Sincerely,

Mrs Isobel Fraser
