

SHDC Planning Officer,
South Lakeland House,
Kendal LA9 4DL

Dear Sir/Madam,

LAND ALLOCATIONS - PROPOSALS R121M

We have already written to object to the former proposal, but would like to formally object to the most recent version as amended. Problems about drainage etc will be made worse by the proposed increase in the number of dwellings, long periods of continuous torrential rain happen from time to time and no development should be allowed which increases flood risk, and the site in question is on very steeply sloping land with residential development existing immediately below, including our house.

Building more houses on this slope also causes more impact on the landscape which it would not do so as much on land that is more level. There are also concerns about the additional road traffic that extra dwellings would cause particularly in terms of safety and congestion.

We are not re-stating all the concerns we made previously but would like them to still be taken into consideration where they still apply to the new proposal. Yours faithfully
