Ref = Allocation of 'Good Agricultural Land For Housing
In Levens
Village

Does anyone in planning dept know the meaning of a Village?

SMALL Group of Houses in a Country Area
ie = RURAL COMMUNITY.

Excuse my ignorance but I fail to understand why anyone feels Levens Village needs housing on the vast scale proposed by SLDC. Most sites are highly visible from surrounding area & main Rds.

How many Levens residents are waiting for housing? Do SLDC planning ^{realize} these sites are on Valuable agricultural Land needed for providing food that we All need to survive. As a Country we are already importing over 40% of our food, less land more people we will need to import more - Does that make sense? Not to me. As a SMALL ISLAND we are already overpopulated Why encourage even more - we are already supporting many people on benefits at TAX PAYER'S Expense how long can that continue it will eventually Bankrupt the country. Where will these people be employed? How is the local community going to cope with population explosion? ie Police - Schools - Medical Services - Youth & Elderly? local Infrastructure is not made to cope with more access to Main Rds - etc etc.

I Thought All local councils & Government were Elected By The People For The People, Local Concerns should be passed to central Government - Those who claim to be working! for us Mere Mortals who pay their large wages Should listen.
