Dear Sir

24.8.11

Re: Objection to Planning Applications
RN302 and ON50 (R121M previously)

We would like to register our objection
to any development whatsoever.

1. The effectiveness of the Stockbeck
Flood Alleviation Scheme would be
compromised - apparently the scheme
wasn't completed in its entirety and
has 'burst its banks' several times now.
2. The increase in properties, therefore
traffic on an already busy road.
Surely air pollution would be an issue?
3. The increase of pupils at an already

over-subscribed school.

4. The effect on natural habitat for the great crested newt.

Obviously, our greatest concern is that SUDC seem oblivious to the potential harm that could be caused if the Stockbeek Flood Attenuation Scheme failed - who would be accountable, SUDC or the developer?

We look forward to receiving a positive response to our concerns.

Yours faithfully
