Comments about suggested site allocations (and other map designations)

Please use this form to comment on emerging options and other sites as they appear on the settlement maps. **Please complete one of these sheets for every response you make.**

Which site or allocation do you wish to comment on?			
Settlement (e.g. Natland)	Map Number (e.g. 11)	Site reference number (e.g. R62)	Other designation – If you want to comment on something that doesn't have a site reference (e.g. development boundary, town centre boundary, green gap) please describe it here
Cartmel	33	R112	
Do you support, oppose or support in part the suggested allocation or designation? (delete as appropriate)			
We do not support the suggested site allocation/designation for the following use(s) Housing/employment/retail other (specify).....			
Please explain your reasons (continue on a separate sheet/expand box if necessary)			
<p>We understand the strategy for additional housing in South Lakeland.</p> <p>Our main concern with any development in Cartmel is that is sympathetic to our historic and beautiful village and meets a genuine local need. We would therefore prefer to see small linear developments</p> <p>Our main concerns with this site are:</p> <p>Has adequate consideration been given to how any potential development will be accessed from the existing road structure? What consideration is being given to pedestrian access along Haggs Lane from this potential site to the village shops and schools? We believe that speed restrictions would be vital as this is already a dangerous stretch of road. Has this been considered?</p> <p>What impact would there be on Hesketh Wood? Has an environmental impact assessment been undertaken? More housing means more cars which equals more pollution!</p> <p>What type of housing is proposed for this site? This will have a key impact on the use of local village services and on the landscape setting. We are keen that any development encourages local occupancy to avoid the proliferation of second homes. Has a strategy been developed for this?</p> <p>Has adequate consideration been given to increased water requirements, sewerage requirements, additional street lighting that extra housing will demand in terms of capacity, cost and environmental impact?</p>			

How to suggest sites which do not appear on the maps

If you want to suggest a site that does not appear on the maps **please provide a map** with the site outlined in red. Please state the uses which you propose allocating the site for and explain your reasoning. Also, please include the name of the landowner if known.

We do not wish to suggest any further sites

Comments about community facilities in your area

New development can provide benefits to communities through enabling the delivery of improved or new community facilities (for example, play areas, allotments, green space, car parks, traffic management, pedestrian and cycle links, health and education facilities and community centres etc).

Do you think that your area needs new or improved community facilities?

If so, what sort of facilities and where?

Please explain the types of improved and/or new community facilities you feel your community may need in the next 15 years (continue on a separate sheet/expand box if necessary).

Cartmel is relatively well provided for so we have no actual requests. We would request that a post office service is maintained

Comments about the documents and approach

Please respond here if you have any comments to make about the documents and approach. Please indicate the name of the document, page number, paragraph number or policy reference (where applicable) by ticking the appropriate box.
