Subject: DPD Submission Objection

Dear Sir

I am writing to object to the proposed LDF for Burton in Kendal. We have lived in this village since 1992 and have seen the amenities shrink so it seems incredible that housing should expand. The pressure that the new development would put on the sewage, drainage, roads and pavements would be intolerable. The access would also be under strain, at busy school times now it is grid-lock getting around the village. As of yesterday, when Burton Butchers closed, we have one shop in the village. We used to have the shop, a bakers, a post office, a bank, a hairdressers, two pubs and a garage at either end of the village. There is no employment locally for any residents and a bus service which you can only take at limited times of the day, putting more pressure on the roads. The car parking in Burton has always be problematic without another potentially 146 more cars - and that is only counting one car per household. There must surely be more sensible places to build where there is employment, health services, shops, public transport and space etc..

Kind Regards  
Lesley McCanney
