Response to Consultation Response Form

Section 2 – Background

2.10

If a principal purpose of the AONB DPD is to ... take into full account the protection and enhancement of the natural beauty of the area, etc. then NO development should take place on any of the open areas within the boundaries of the AONB.

In particular, my response relates to sites W83 (westerly portion); W84; W87, W88, W89, W90, W92, W93, W94 and W95.

2.16

Warton has historical significance. LPAs are also directed to allocate land of lesser environmental value for development with AONBs being counted as at the highest value. For those two reasons, development of open green areas within the settlement of Warton would be highly inappropriate and unfair to the current and future generations.

Q1 It should be considered on a case-by-case basis. Even one property could have an adverse effect on the AONB if built in on inappropriate site.
